Data Logging Solutions for Restaurant Temperature Monitoring

MadgeTech
WE BUILD DATA LOGGERS
MadgeTech has been a key resource for the restaurant, retail food and beverage industry for over 20 years, offering a wide range of temperature monitoring solutions. We have a deep commitment to facilitating regulatory compliance and promoting best practice in food safety. MadgeTech data loggers and monitoring systems have become synonymous with HACCP compliance and process verification throughout the food industry, both domestically and internationally.

Most importantly, the MadgeTech name is widely known for both quality and reliability.

As a provider of leading-edge technology, MadgeTech offers a diverse line of wireless data logging systems for environmental and facility monitoring. This allows FSQA personnel to see both product and process temperatures in real-time. From refrigerators to freezers and blast chillers, from the production floor to packaging and storage, MadgeTech provides an easily scalable temperature and humidity data monitoring solution for even the most challenging environments.

Our goal is to continue to provide the tools needed to help restaurant food professionals perform their jobs more effectively and efficiently while providing safe products.

When you think consumer food safety, think MadgeTech.
Preserve Perishables and Protect Profits

MadgeTech wireless data loggers provide real-time temperature and humidity data to restaurant staff or national and regional managers. Deploy data loggers throughout the facility in key areas and monitor information from a central PC or smartphone. Receive data from all departments to generate a complete profile the entire store, market or facility.

**Environmental Temperature and Humidity**

**RFRHTemp2000A**

Maintain ideal conditions and prevent product loss.

- Monitor temperature and humidity in stockrooms, storage and retail space
- Real-time data displayed on device LCD screen and remotely on PC
- Audible and visual alarms for unsafe temperatures

**Monitor Refrigerated Product**

**RFTCTemp2000A**

Measure both environmental and internal product temperatures.

- Walk-in freezers, refrigerators and coolers
- Measure remote or internal temperatures using a thermocouple probe
- Device displays readings on an easy to read LCD screen
- Alerts will notify staff of unsafe temperatures

Chain restaurants and franchises must be able to guarantee that they’re shipping and receiving safe, properly-handled food at their establishment and warehouse facilities. To support this vital link in the supply chain, MadgeTech manufactures shipping data loggers that travel with food in trucks and containers to provide a clear picture of product exposure while in transit.

**Economical Transit Temperature Monitoring**

**TransiTemp-EC**

The TransiTemp-EC temperature data logger is designed for high volume, low cost in-transit recording.

- Compact and easy to deploy in crates or cases along with product
- Verify handling of produce and other temperature sensitive foods
- Alerts users to unsafe temperature exposure with LED warning
- Records data to provide minute-by-minute reports of conditions throughout shipping

**Splash-Proof Cold Chain or Display Monitoring**

**TransiTempII**

The TransiTempII temperature data logger is designed for use in cold chain transit recording or retail storage and display.

- Compact and portable to be easily deployed with product on the shelves or on the road
- Splash-proof rugged design withstands the moisture of products on ice
- LED lights indicate unsafe temperature exposure
- Start or stop logging controls directly on the device
Monitor In-House Cooking and Processing

As the restaurant and retail food industry grows, food safety requirements and the demand for high temperature monitoring continues to grow as well. Oven temperature profiling as well as cooking and cooling verification are essential to producing safe products and meeting regulatory compliance needs.

Meat Smoking, Cooling and Storage Temperature

RFOT

The MadgeTech RFOT is a real-time, wireless data logger that monitors the internal temperatures of meat products throughout cooking, smoking, cooling and refrigeration.

• Monitor internal meat temperature throughout multiple processes
• Rugged built in hook allows RFOT to conveniently hang on racks along with meat products
• Probe styles to accommodate sausage, beef and other products large and small
• Splash-proof design to endure cooking environments and wash down cycles
• Wireless operation allows for remote monitoring of multiple ovens or locations

Available Probe Lengths

• 1.75 in (70mm)
• 4.0 in (102 mm) RFOT-FR (Fast Response)
• 4.0 in (102 mm) RFOT-4-TD (Transitional Diameter)
• 7.0 in (177 mm) RFOT 7

Validate Roasting Temperature

HiTemp140

The HiTemp140 series of temperature data loggers are specifically designed to validate high temperature cooking and roasting.

• Ensure safe chicken roasting temperatures throughout cooking and cooling
• Monitor internal temperature of pork, beef or other meat products cooked on site
• Fully submersible and designed to withstand oven roasting temperatures
• Generate reports to validate prevention of foodborne illness

Wireless Warehouse Mapping and Monitoring

Create A Complete Profile

Deploy data loggers throughout any warehouse or storage facility to identify problem areas and inconsistencies.

Start Logging In Four Easy Steps

1. Setup the RFC1000 transceivers
2. Deploy the data loggers
3. Wirelessly start the data loggers
4. Data is instantly transmitted to a computer or to the MadgeTech cloud for real-time monitoring.

Data Logging Hub
RFC1000 Cloud Relay

The RFC1000 Cloud Relay is a data logging hub that transmits live data directly to MadgeTech Cloud Services.

- Eliminates the need for a central monitoring PC
- Manage any number of loggers from a single device
- Data can be downloaded for further analysis

Quick and Easy Setup

All MadgeTech Wireless Data Loggers are cloud ready and can be up and running in just minutes. Unlike many other custom cloud data logging solutions, the MadgeTech Cloud Services platform offers a production-ready ‘out of the box’ solution as well as highly customized packages.
Manage All Restaurant Locations from Anywhere in the World

With a free MadgeTech Cloud Services account, real-time logger data can be viewed on any internet-enabled device from anywhere in the world. This provides the ultimate peace of mind, allowing local and regional managers to receive instant notification and view conditions for any facility, even when they’re off-site. These tools ensure consistency and quality control across a chain of establishments.

Transmit data directly to MadgeTech Cloud Services with the RFC1000 Cloud Relay

The MadgeTech Data Logger software is user friendly and enables the user to effortlessly collect, display and analyze data. A variety of powerful tools can be used to examine, export and print professional quality reports with just a click of the mouse.

This software can be downloaded for free from the MadgeTech website.

Software Features

- Multiple Graph Overlay
- Statistics
- Digital Calibration
- Zoom In / Zoom Out
- Cooling Flags
- Lethality Equations (F0, PU)
- Mean Kinetic Temperature
- Full Time Zone Support
- Data Annotation
- User Friendly File Management
- Min. / Max. / Average Lines
- Timeslice
- Data Table View
- Automatic Report Generation
- Summary View
- Workflows / Automation
Easy-to-use, Windows-Based Software

Cooling Flags  Automation  Tabular Data View  Export to Excel  Alarm Notifications

The MadgeTech Data Logging Software makes record keeping a simple task. Easily tailor graphs and create custom reports for the product being processed to help comply with federal guidelines and regulations.
